

Specialty Corrugated Products

"S-Pads"

IPSCO would like to profile a product line of which we have had much success. The items are Corrugated U-Channels, Angles, Corners & Built up pads.

They can be designed & custom built to fit your customers needs. S-Pads are used to effectively protect furniture, wood and metal cabinets, specialty windows, counters, machinery and many other items. Michaelman coated, tissue and foam lined are available where additional protection is required.

These specialty corrugated items are environmentally friendly and cost effective.

Angles

Channels

Built Ups

Corners

Sheets
